

AUTOMOTIVE SERVICE EXCELLENCE xEV

DURATION

16 hours

TYPICAL SCHEDULE

Runs for roughly three weeks,
meeting three times weekly

LOCATION

On-campus instruction

Get ready for the future of automotive technology with training in electrified vehicles (xEVs). Level One covers high-voltage safety, while Level Two dives into xEV construction, operation, and repair with safe work practices and PPE use.

This three-week, on-campus program meets three times per week and prepares participants for the ASE xEV High-Voltage Electrical Safety certification.

As electric vehicles grow in popularity, demand for skilled technicians is rising. Completing this program opens career opportunities in dealerships, EV service centers, and fleet management.
